techniques for estimation of, interpretation of results obtained by various, 219
thermal range of activity of, from red cells in autoimmune hemolytic anemia, 74
Antibody, age distribution of, against herpes simplex virus, 4
latent, detection of, in ABO hemolytic disease, 888
pattern in idiopathic acquired hemolytic anemia, an unusual, 245
Antigenic stimulation of lymph nodes in agammaglobulinemia, 173
Antigens, platelet, studies on. II. A_1 and A_2 subgroups in blood platelets, 530
Antihemophilic factor, human, storage lability of, studies on, 111
Antihistaminics and alkaloids, descending chromatographic behavior and differentiation of some, 628
Antihypertensive effects of metal binding agents, 416
Antipyrine and I^{131}-labeled 4-iodo-antipyrine, comparison of volume of distribution of, in human beings, 619
Antiserum, rabbit, prepared by immunizing rabbits with purified human glomerular basement membrane or dog glomerular basement membrane nephrotoxic properties of, 956 (Abst.)
Antisheep red cell serums, hemolytic and blocking activities of, comparison of, 959 (Abst.)
Antitoxin response of Schick-negative rheumatic and nonrheumatic subjects to diphtheria toxoid, 941 (Abst.)
Aortic insufficiency, effect of mild steady state exercise on general and cerebral hemodynamics of patients with, 947 (Abst.)
APC viruses, association of, with respiratory illness in student population, 812 (Abst.)
Apparatus, automatic rotating cuff, 615
Arterial dilution curves in study of heart disease, methylene blue as an indicator in, 816 (Abst.)
sounds as indices of cardiovascular function, 944 (Abst.)
Arteritis, temporal, 829 (Abst.)
Assay of intrinsic factor preparations, 60
of prothrombin, a simple-specific one-stage, using Russell's viper venom in cephalin suspension, 89
of urorennin, use of lyophilized milk in, 318
Asthma, treatment of, evaluation of bronchodilator drugs in, 348
Atherosclerosis, cholesterol-induced, in rabbit, effect of environmental temperature on, 954 (Abst.)
Atrial pressures, right, of patients with heart failure, effect of tilting on, 935 (Abst.)
Autoantibodies in acquired hemolytic anemia, specificity of, 805 (Abst.)
Automatic rotating cuff apparatus, 615
A-V junction, preferential and accessory conduction pathways in, 937 (Abst.)

B

Bacteremia in typhoid fever, 131
Bacterial pyrogens, pyrexin the pyrogenic factor in inflammatory exudates and its relation to, 423
Bactericidal rates of penicillin, similarity of, for streptococcus viridans from successfully treated cases of bacterial endocarditis and from cases which relapsed, 41
Ballistocardiography and electrical impedance plethysmography, constant mass displacement, 270
B-complex vitamins, effect of, in acute alcoholic intoxication, 12
Bile acids in normal human serum with comparative observations in jaundice, 802 (Abst.)
Bilirubin output, effect of intravenous fat emulsion on total, as measure of hemolysis in human subjects, 934 (Abst.)
Binding power, relationship of, to intrinsic factor activity, 796 (Abst.)
Biochemical changes in erythrocytes during hemolysis induced by aniline derivatives, 814 (Abst.)
Biogenesis of steroid hormones in man, role of progesterone in, 964 (Abst.)
Blocking antibodies, mode of action of, evaluation of alternative theories for, 199
Blood agar medium, penicillin, for use in routine diagnostic cultivation of mycobacterium tuberculosis, 329
and tissue stages of falciparum malaria, antimalarial action of primaquine against, 391
carbon monoxide determination, simple micromethod for, 905
cell abnormalities complicated by thrombosis, 514
and plasma 17-hydroxycorticosteroid changes following x-irradition in Rhesus monkey, 816 (Abst.)
chemistry in epidemic hemorrhagic fever, 33
coagulation, nonspecific factors in, 641
drop test studies on, prognostic value of, in thromboembolism, 499
for transfusion, preservation of. I. The effect of plastic containers on red cells, 225
levels of 17-hydroxycorticosteroids in normal and toxemic pregnancies, 385

Blood—Cont'd
pepsinogen in, 568
comparison of, in duodenal and gastric ulcer and gastric carcinoma, 933 (Abst.)
persistence in, of radioactive label of albumin, gamma globulins, and globulins of intermediate mobility. III. Comparison of die-away plots following oral and intravenous administration of S^{35} label to the same subjects, 857
picture, normal, and "alarm reaction" in macaca mulatta, 925 (Abst.)
pigments, in vivo spectra of, method for obtaining, 285
pressure effects of Rauwolfia serpentine and Reserpin in essential hypertension, 928 (Abst.)
rate of removal of gelatin-stabilized radiogold colloid from, factors affecting. I. The retardation of the radiogold disappearance rate by gelatin, 263
reaction of serous cavities to, 48
serum, protein fractions of, effect of pyrexin on pyogenic activity of, 431
single donor, in vitro comparison of effects of four different preservative solutions on, with special emphasis on rate of flow, 234
stream, isolation of Salmonella typhi from, 128
sugar and serum amino acid concentrations in viral hepatitis, effect of amino acid-glucose infusions on, 560
thyroxine levels, high, site of action of, in bringing about thyroid gland inhibition, 822 (Abst.)
uncontaminated, for oxyhemoglobin, spectrophotometric analysis of, 486
Body water, total, measurement of, in human beings, 619
Bone marrow and lymph nodes, failure of plasma cell formation in, in agammaglobulinemia, 167
Brain, cell-free filtrates of, enhancement of development of AKR lymphoma by, 949 (Abst.)
Bromsulfalein test, the "corrected," 827 (Abst.)
Bronchodilator drugs, evaluation of, in treatment of asthma, 348
Bronchospirometry, methodologic error in, investigation of, 298
Brucella endotoxin, protective action of chlorpromazine against, 790 (Abst.)

C

Calcium, effect of, on fibrinolytic activity of human plasma, 965 (Abst.)
serum, determination of, micromethod for, 662
Carbohydrate, dietary, influence of, on development of starvation diabetes in man, 804 (Abst.)
Carbohydrate—Cont'd
with and without testosterone, protein-sparing effect of, 840
Carbon^{14}-labeled acetate utilization by tubercle bacilli, determination of, 917, 960 (Abst.)
monoxide determination in blood, simple micromethod for, 905
Carboxyl-labeled sodium acetate, use of, to study cholesterol metabolism in man, 372
Cardiac edema, intractable, indications for adrenal hormones in treatment of, 820 (Abst.)
failure, high output, 801 (Abst.)
output, determination of, by dilution method without arterial sampling, 939 (Abst.)
in vivo method for determination of, 932 (Abst.)
Cardio-arterial thromboembolism, drop test studies on blood in, 511
Cardiovascular function, arterial sounds as indices of, 944 (Abst.)
involvement in epidemic hemorrhagic fever, 31
Catechol amines in urine, estimation of, by means of rabbit aortic strip as an aid in diagnosis of pheochromocytoma, 824 (Abst.)
Central Society for Clinical Research, proceedings of twenty-eighth annual meeting, 790, 924
C.F. test for herpes simplex, specificity of, 3
Chelates, lanthanum and yttrium metabolism of, 182
Chewing tobacco, immediate effect of, on circulation of habitual male chewers, 824 (Abst.)
Chlorpromazine administration, changes in hepatic histology in absence of jaundice after, 952 (Abst.)
protective action of, against Brucella endotoxin, 790 (Abst.)
Cholangiography, intravenous, correlation of, with liver function tests, 800 (Abst.)
Choledyl in treatment of asthma, evaluation of, 351
Cholesterol metabolism in man, use of C^{14}-labeled acetate to study, 372
plasma, origin of, and rates of equilibration of liver, plasma, and erythrocyte cholesterol, 359
synthesis of, during human pregnancy, 937 (Abst.)
Cholesterol-induced atherosclerosis, effect of environmental temperature upon, in rabbit, 954 (Abst.)
Choline-theophyllinate in treatment of asthma, evaluation of, 351
Chorioallantoic membrane in embryonated chicken eggs, new technique for dropping the, 648
Christmas factor, variable manifestations of, 80

Chromatographic, descending, behavior and differentiation of some antihistaminics and alkoloids, 628
estimation of four different human hemoglobins, 255
Circulation, disappearance rate of radiogold from, 263
of habitual male chewers, immediate effect of chewing tobacco on, 924 (Abst.)
Co_2 content of serum, determination of, efficient clinical method for, 312
Co^{60}-vitamin B_{12} urinary excretion of, as test for effectiveness of intrinsic factor preparations, 665
Colitis, ulcerative, experimental studies on, 812 (Abst.)
Collagenase, an enzyme of the pancreas, 966 (Abst.)
Complement fixation test for syphilis, a new, 147
Congestive heart failure, aldosterone in, role of, 820 (Abst.)
Copper, excretion of, by animals, 702
metabolism, studies on. XV. The excretion of copper by animals, 702
Coronary artery disease, electrical instability of heart in, 798 (Abst.)
blood flow and myocardial oxygen consumption, comparative hemodynamic study, in normal, thyrotoxic, hypertensive, and mitral stenotic human subjects, 945 (Abst.)
Corticosteroid excretion, mechanism of, association of 17-OH corticosteroids and 17-OH corticosteroid glucuronides with plasma proteins, and, 807 (Abst.)
Cortisone, acquired hemolytic anemia treated with, paroxysmal nocturnal hemoglobinuria complicated by, 443
effects of, on serum lipids and lipoproteins in adrenal hyperplasia, 818 (Abst.)
Cuff apparatus, automatic rotating, 615
Cultivation of tissues in small sealable dishes, 144

D

Deglutition pressures in esophageal disorders, 953 (Abst.)
Depressions caused by home exposures to gas and combustion products of gas, oil, and coal, 942 (Abst.)
D-glucuronolactone isonicotinyl hydrazone, laboratory and clinical studies of, in pulmonary tuberculosis, 597
Diabetes mellitus, metabolic defects in, correction of, by continuous fructose feeding, 934 (Abst.)
Diabetic patients, urinary excretion of acid mucopolysaccharides by, 193
Diamox and PAH, simultaneous infusion of, effect on renal electrolyte transport in normal and nephrotic children, 333
Diamox—Cont'd
effects of inhibition of renal carbonic anhydrase by, in normal and toxemic pregnancies, 733
Diastolic overload in mechanical ventricular alternans, 342
Dicumarol, effect of, on thromboplastin formation, 955 (Abst.)
Dietary carbohydrate, influence of, on development of starvation diabetes in man, 804 (Abst.)
Diffuse pulmonary fibrosis, effects upon mechanics of lung ventilation, 791 (Abst.)
spasm of esophagus, intraesophageal pressures in, 804 (Abst.)
Diphtheria toxoid, antitoxin response of Schick-negative rheumatic and nonrheumatic subjects to, 941 (Abst.)
Disodium calcium versenate (Ca EDTA), effect of, on iron excretion in man, 534
Disseminated lupus erythematosus, case with LE cells, antemortem and postmortem, and pulmonary, renal, splenic, and muscular lesions of, 806 (Abst.)
experimental hydralazine disease and its similarity to, 803 (Abst.)
Drop test studies on blood, prognostic value of, in thromboembolism, 499
Drug therapy of essential hypertension, 810 (Abst.)
Duodenal and gastric ulcer, comparison of blood pepsinogen in, and in gastric carcinoma, 933 (Abst.)
ulcer, basal and histalog secretion in, 307
Dystrophia myotonica, serum gamma globulin in, 967 (Abst.)

E

Edema, intractable cardiac, indications for adrenal hormones in treatment of, 820 (Abst.)
Electrical impedance plethysmography and ballistocardiography, constant mass displacement, 270
instability of heart in coronary artery disease, 798 (Abst.)
Electrocardiograms in normal subjects resembling high anterior myocardial infarction, 946 (Abst.)
Electrometric uniometry, 141
Electronic switch for monitoring two physiologic events simultaneously on a single-beam oscilloscope, 494
Electrophoresis in agar plates, 689
quantitative filter paper, comparative studies in, 772
Embryonated chicken eggs, dropping the chorioallantoic membrane in, new technique for, 648
Endocarditis, bacterial, streptococcus viridans from successfully treated, similarity of bactericidal rates of penicillin from, and from cases which relapsed, 41

Endotoxin from gram-negative microorganisms, shock produced by, role of central nervous system in, 962 (Abst.)
Environmental dissemination and aerial transmission of tubercle bacilli, 791 (Abst.)
temperature, effect of, upon cholesterol-induced atherosclerosis in rabbit, 954 (Abst.)
Epidemic hemorrhagic fever, laboratory findings in, 28
Epidemiologic studies in outbreak of histoplasmosis, 592
Epidemiology of influenza as revealed by serum pools from various age groups, 799 (Abst.)
Erythroblastosis fetalis, management of, problems in. II. Additional examples exhibiting unusual clinical and serologic findings, 757
Erythrocytes, biochemical changes in, during hemolysis induced by aniline derivatives, 814 (Abst.)
granules in normal human, a stain for, 885
viability of human, returned to circulation after refrigerated storage, method employing radioactive chromium for assaying the, 679
Erythrocytin, new clotting factor from erythrocytes, its value in study of hemophilia, 940 (Abst.)
Erythropoiesis, stimulation of, by plasma from anemic rats using Fe^{59}, 671, 938 (Abst.)
uptake of radioiron in bone marrow as a measure of, 941 (Abst.)
Esophageal disorders, deglutition pressures in, 953 (Abst.)
Esophagus, diffused spasm of, intraesophageal pressures in, 804 (Abst.)
Estrogen therapy, long-term, in men under fifty with a previous single myocardial infarction, interim report of effects of, 955 (Abst.)
Ethyl alcohol, effect of oral, on hepatic transaminase and choline esterase activity and pyruvate concentration in the rat, 824 (Abst.)
Euglobulin of serum, effect of intravenous bacterial pyrogens on, 427
Euthyroidism and exophthalmic goiter, I^{131} uptake by thyroid gland in, inhibitory effect of l-tri-iodothyronine on, 932 (Abst.)
Exercise, effect of mild, steady, on general and cerebral hemodynamics of patients with aortic insufficiency, 947 (Abst.)
Exophthalmic goiter and euthyroidism, I^{131} uptake by thyroid gland in, inhibitory effect of l-tri-iodothyronine on, 932 (Abst.)
Experimental and statistical studies on Rh antibodies, 199
Experimental—Cont'd
histoplasmosis in large animals, 948 (Abst.)
hydralazine disease and its similarity to disseminated lupus erythematosus, 803 (Abst.)
hypertension, method of producing perinephric, 914
liver injury, mechanism for diminished ketogenesis in, 942 (Abst.)
ulcerative colitis, studies on, 812 (Abst.)
Extracellular space, measuring by sucrose infusions, problems in, 936 (Abst.)

F

Falciparum malaria, blood and tissue stages of, antimalarial action of primaquine against, 391
Familial primary systemic amyloidosis, 925 (Abst.)
Fat emulsion, intravenous, effect of, on total bilirubin output as a measure of hemolysis in human subjects, 934 (Abst.)
emulsions, intravenous, in human subjects, study of two, 450
metabolism, derangement of, 461
"Fibrinoid" of renal cortical necrosis due to Shwartzman reaction, characterization of, 797 (Abst.)
Fibrinolytic enzyme system of human plasma, 951 (Abst.)
Filter paper electrophoresis, quantitative, comparative studies in, 772
Flask for study of growth dynamics of tubercle bacilli, 651
Folic acid deficiency, aggravation of clinical manifestation of, by administration of small doses of vitamin B_{12}, 822 (Abst.)
Formaldehyde production, urinary, after periodic acid oxidation, demonstration of inhibition of, as related to volume of urine samples oxidized, 323
Fructose feeding, continuous, correction of metabolic defects in diabetes mellitus by, 934 (Abst.)

G

Gas, oil, and coal, gas and combustion products of, depressions by home exposures to, 942 (Abst.)
Gastric analysis, "tubeless," quantitative modification of, 895
pepsin, relation between plasma pepsinogen and, 575
secretory response to histalog, 307
ulcer, basal and histalog secretion in, 307
Gelatin-stabilized radiogold colloid, rate of removal of, from blood, factors affecting. I. The retardation of the radiogold disappearance rate by gelatin, 263

Glomerular filtration and renal vascular tone, effect of anemia and polycythemia on, 948 (Abst.)
Glucocorticoids, blood levels of, in normal and toxemic pregnancy, 385
Glucose, ingestion of, hyperglycemia and glycosuria after, in ambulatory patients over 40 years of age, 819 (Abst.)
Glutamic oxalacetic and glutamic pyruvic transaminase in plasma, determination of, new method for, 785
Glycine, plasma, determination of, microdiffusion method for, 657
Gram-negative bacilli, comparative sensitivities of, to antibiotics, 961 (Abst.)
microorganisms, shock produced by endotoxin from, role of central nervous system in, 962 (Abst.)
Granules in normal human erythrocytes, a stain for, 885
Granulocyte fraction antisera, leukocyte response to, 879
Granulocytes, Ottesen's method for separation of, from lymphocytes, a modification of, 781

H

Heart disease, arterial dilution curves in study of, methylene blue as indicator for, 816 (Abst.)
failure, congestive, aldosterone in, role of, 820 (Abst.)
effect of tilting on right atrial pressures of patients with, 935 (Abst.)
in coronary artery disease, electrical instability of, 798 (Abst.)
Hematocrit tube, amount of trapped plasma in red cell mass of, 409
Hematologic responses to intrinsic factor in pernicious anemia relapse, 63
Hematopoietic involvement in epidemic hemorrhagic fever, 31
response, comparison with hepatic uptake of radioactive Co^{60}-B_{12} in pernicious anemia, 60
Hemochromatosis, urinary iron in, effect of disodium calcium versenate on, 535
Hemodynamic effects of pentolinium, 950 (Abst.)
study, comparative, including coronary blood flow and myocardial oxygen consumption in normal, thyrotoxic, hypertensive and mitral stenotic human subjects, 945 (Abst.)
Hemoglobin concentration in man, comparison of venous and arterial, 900
Hemoglobinometry, certified standard for use in, proposal for, 135
Hemoglobins, four different human, chromatographic estimation of, 255
Hemolysis induced by aniline derivatives, biochemical changes in erythrocytes during, 814 (Abst.)
spontaneous, in blood donors, 236
Hemolytic anemia, acquired, and viremia, 580
specificity of autoantibodies in, 805 (Abst.)
treated with cortisone, paroxysmal noctural hemoglobinuria complicated by, 443
autoimmune, antibodies eluted from red cells in, thermal range of activity of, 74
idiopathic acquired, antibody pattern in, an unusual, 245
in myelofibrosis with splenomegaly, 927 (Abst.)
disease, ABO, detection of latent antibody in, 888
plasma factor in untreated pernicious anemia, 821 (Abst.)
Hemophilia, erythrocytin, new clotting factor from erythrocytes, its value in study of, 940 (Abst.)
Hemorrhagic fever, epidemic, laboratory findings in, 28
lipemia: a derangement of fat metabolism, 461
manifestations associated with thrombocythemia, mechanism of, 930 (Abst.)
telangiectasis, hereditary, clinical, sociologic, and genetic study of, 795 (Abst.)
Heparin, inhibitory effect of, upon adenylic deaminase, 807 (Abst.)
plasma, determination of, improved method for, 653
precipitable fraction of human plasma, 953 (Abst.)
Hepatectomy, effect of, on plasma cholesterol, 361
Hepatic cirrhosis, association of low serum magnesium concentrations and deleterious effects of ammonia in, 814 (Abst.)
histology, changes in, in absence of jaundice following administration of chlorpromazine, 952 (Abst.)
involvement in epidemic hemorrhagic fever, 34
transaminase and choline esterase activity and pyruvate concentration in rat, effect of oral ethyl alcohol on, 824 (Abst.)
uptake of radioactive Co^{60}-B_{12}, comparison with hematopoietic response in pernicious anemia, 60
Hepatitis, viral, serum amino acid and blood sugar concentrations in, effect of amino acid-glucose infusions on, 560
Hepatocellular integrity, serum glutamic oxalacetic transaminase as an index of, 831
Hereditary deficiency of proaccelerin, a family study, 98
hemorrhagic telangiectasis, clinical, sociologic, and genetic study of, 795 (Abst.)

Herpes simplex virus infections, serologic investigations of, 1
High output cardiac failure, 801 (Abst.)
Histalog, gastric, secretory response to, 307
Histopathology and clinical studies in pyelonephritis, correlation of, 925 (Abst.)
Histoplasmosis, epidemiologic studies in outbreak of, 592
experimental, in large animals, 948 (Abst.)
of adrenal glands, Addison's disease due to, 958 (Abst.)
Hydralazine disease, experimental, and its similarity to disseminated lupus erythematosus, 803 (Abst.)
reaction, 806 (Abst.)
Hydrocortisone acetate, intra-articular injection of, chemical studies on synovial fluid relative to, 720
effects of, on urinary excretion of sodium in adrenalectomized rats, 729
treatment of idiopathic hypoproteinemia, 825 (Abst.)
17-Hydroxycorticosteroids, blood levels of, in normal and toxemic pregnancy, 385
Hyperglycemia and glycosuria after ingestion of glucose by ambulatory patients over 40 years of age, 819 (Abst.)
Hyperpotassemia, effects of, in presence of hypocalcemia, 547
Hypersensitivity, nucleophagocytosis and, 823 (Abst.)
Hypertension, accelerated, treated with Ansolysen, water and electrolyte balance in, 963 (Abst.)
blood pressure effect of Rauwolfia serpentine and Reserpin in, 928 (Abst.)
drug therapy of essential, 810 (Abst.)
ganglionic blocking agents in treatment of, pharmacodynamic studies on three, 828 (Abst.)
perinephric experimental, method of producing, 914
Hypertensive patients, concentration of trace metals in urine of treated and untreated, compared with normal subjects, 936 (Abst.)
Hypocalcemia induced by sodium ethylenediamine tetraacetate, influence of, on toxicity of potassium, 544

I

I^{131}-labeled 4-iodo-antipyrine and N-acetyl-4-amino-antipyrine, comparison of volume of distribution of, in human beings, 619
Idiopathic acquired hemolytic anemia, antibody pattern in, an unusual, 245
hypoproteinemia, treatment with hydrocortisone, 825 (Abst.)
In vitro activity against Micrococcus pyogenes, 583
In vivo demonstration of lupus erythematosus phenomenon, 624
method for determination of cardiac output, 932 (Abst.)
spectra of blood pigments, a method for obtaining, 285
Infection, serum proteins and mucoproteins in, 808 (Abst.)
virus, herpes simplex, serologic investigations, 1
Inflammatory exudates, pyrexin the pyrogenic factor of, and its relation to some bacterial pyrogens, 423
Influenza, epidemiology of, as revealed by serum pools from various age groups, 799 (Abst.)
virus vaccines derived from experimental rats, a rationale for modification of, 826 (Abst.)
Intermittent claudication, 926 (Abst.)
Intraesophageal pressures in diffuse spasm of esophagus, 804 (Abst.)
Intravenous cholangiography, correlation of, with liver function tests, 800 (Abst.)
fat emulsions in human subjects, study of two, 450
streptokinase in man, studies with, 951 (Abst.)
Intrinsic factor activity, relationship of binding power to, 796 (Abst.)
preparations, assay of, 60
preparations, effectiveness of, urinary excretion of Co^{60}-vitamin B_{12} as a test for, 665
Inversine, pharmacology of, 815 (Abst.)
Iodine, serum protein-bound, correction of erratic reagent blanks in determination of, 902
Iron excretion in man, effect of disodium calcium versenate on, 534
Iron-refractory hypochromic anemia responding to oral crude liver preparation, 829 (Abst.)
Isoniazid in vitamin B_6-deficient rats, 549

J

Jaundice, bile acids in normal human serum with comparative observations in, 802 (Abst.)
Jaundiced patients, comparison of "corrected" Bromsulfalein test with the cephalin-cholesterol flocculation test and the thymol turbidity reaction in, 827 (Abst.)

K

Ketogenesis, diminished, in experimental liver injury, mechanism for, 942 (Abst.)

L

Laboratory findings in epidemic hemorrhagic fever, 28
methods, 135, 312, 476, 628, 772, 902
Lanthanum and yttrium chelates, metabolism of, 182

Left auricular puncture, evaluation of mitral and aortic valvular disease by, 967 (Abst.)
Leukemia, effect of selenium cystine on, 962 (Abst.)
studies in. III. Agglutination of human leukemic cells by guinea pig serum, 709
Leukoagglutinins in neoplastic disorders of reticuloendothelial system, observations on, 797 (Abst.)
Leukocyte nuclear and cytoplasmic antisera, leukocyte response to, 871
response to granulocyte fraction antisera, 879
to leukocyte nuclear and cytoplasmic antisera, 871
Lipemia, hemorrhagic: a derangement of fat metabolism, 461
Liver disease, effects of intragastric administration of whole blood on concentrations of blood ammonia, serum K, urea, and NPN in, 801 (Abst.)
serum vitamin B_{12} concentrations in, 927 (Abst.)
vitamin K in, use of large doses of, 951 (Abst.)
function in epidemic hemorrhagic fever, 33
tests, correlation of intravenous cholangiography with, 800 (Abst.)
injury, experimental, mechanism for diminished ketogenesis in, 942 (Abst.)
metabolism, perfusion technique for study of, 155
plasma, and erythrocyte cholesterol, rates of equilibration of, origin of plasma cholesterol and, 359
preparation, iron-refractory hypochromic anemia responding to an oral crude, 829 (Abst.)
Logarithmic estimates, table of, 213
Lung ventilation, mechanics of, effects of diffuse pulmonary fibrosis upon, 791 (Abst.)
Lupus erythematosus phenomenon, in vivo demonstration of, 624
rational therapy of systemic, 929 (Abst.)
Lymph nodes, failure of plasma cell formation in bone marrow and, in agammaglobulinemia, 167
response of, to antigenic stimulation in agammaglobulinemia, 173
Lyophilized milk, use of, in assay of urorennin, 318

M

Macaca mulatta, "alarm reaction" and normal blood picture in, 925 (Abst.)
Magnesium concentrations, low serum, association of, and deleterious effects of ammonia in hepatic cirrhosis, 814 (Abst.)
Malaria, falciparum, blood and tissue stages of, antimalarial action of primaquine against, 391
Mecamylamine, pharmacology of, 815 (Abst.)
Metabolic defects in diabetes mellitus, correction of, by continuous fructose feeding, 934 (Abst.)
effects of quinidine in normal men, 813 (Abst.)
Metabolism, cholesterol, in man, use of C^{14}-labeled acetate to study, 372
copper, studies in. XV. The excretion of copper by animals, 702
fat, derangement of, 461
liver, perfusion technique for study of, 155
of lanthanum and yttrium chelates, 182
of pentose 5-phosphate in certain normal and tumor tissues, 792 (Abst.)
vitamin B_6, in post-partum period, 817 (Abst.)
Metal binding agents, antihypertensive effects of, 416
Methodologic error in bronchospirometry, investigation of, 298
Methylene blue as an indicator for arterial dilution curves in study of heart disease, 816 (Abst.)
Micrococcus pyogenes of various combinations of antimicrobial agents, in vitro activity against, 583
Microdiffusion method for determination of plasma glycine, 657
Micromethod for determination of serum calcium, 662
Milk, lyophilized, use of, in assay of urorennin, 318
Mitral and aortic valvular disease, evaluation of, by left auricular puncture, 967 (Abst.)
Molecular filter membrane method for determining aero-allergen concentrations, 471
Mucoproteins and serum proteins in infection, 808 (Abst.)
Muscular dystrophy, human, muscle composition in, 960 (Abst.)
Muscle chloride, determination of, methods for, 910
composition in human muscular dystrophy, 960 (Abst.)
Mycobacterium tuberculosis, penicillin blood agar medium for use in routine diagnostic cultivation of, 329
Myelofibrosis with splenomegaly, hemolytic anemia in, 927 (Abst.)
Myocardial infarction, acute ten-year prognosis of, 963 (Abst.)
effects of long-term estrogen therapy in men under fifty with a previous single, interim report on, 955 (Abst.)
high anterior, electrocardiograms in normal subjects resembling, 946 (Abst.)
ionic exchange, 943 (Abst.)
Rb^{86} uptake rate in man, estimation of, a trial in dogs of methods suitable for, 931 (Abst.)
Myoglobin, adult and fetal, methods of identification, 952 (Abst.)

N

N-acetyl-4-amino-antipyrine and I^{131}-labeled 4-iodo-antipyrine, comparison of volume of distribution of, in human beings, 619
National Academy of Sciences, Division of Medical Sciences, National Research Council, Proposal for distribution of a certified standard for use in hemoglobinometry, 135
Neoplastic disorders of reticuloendothelial system, leukoagglutinins in, observations on, 797 (Abst.)
Nephrotic children, renal electrolyte transport in normal and, 333
syndrome, turnover rate of serum albumin in, as determined by I^{131}-labeled albumin, 747
Neutrophils, alkaline phosphatase activity in, as studied by simple slide test, 817 (Abst.)
Newborn, respiration in, new method for studying, 120
Nondialyzable material in normal human urine, 848
Nonspecific factors in blood coagulation, 641
Nucleophagocytosis and hypersensitivity, 823 (Abst.)

O

Oscolloscope, single-beam, monitoring two physiologic events simultaneously on a, an electronic switch for, 494
Ottesen's method for separation of granulocytes from lymphocytes, modification of, 781
Oxyhemoglobin, uncontaminated blood for, spectrophotometric analysis of, 486

P

PAH and Diamox, simultaneous infusion of, effects of, on renal electrolyte transport in normal and nephrotic children, 333
Pancreas, collagenase an enzyme of, 966 (Abst.)
Pantothenic acid deficiency induced in human subjects, 793 (Abst.)
relationship of, to adrenocortical hormone secretion, 811 (Abst.)
Parahemophilia, a family study, 98
Paroxysmal nocturnal hemoglobinuria complicated by acquired hemolytic anemia treated with cortisone, 443
Penicillin, bactericidal rates of, similarity of, for streptococcus viridans from successfully treated cases of bacterial endocarditis and from cases which relapsed, 41
blood agar medium for use in routine diagnostic cultivation of mycobacterium tuberculosis, 329
Pentolinium, hemodynamic effects of, 950 (Abst.)
Pentose 5-phosphate, metabolism of, in certain normal and tumor tissues, 792 (Abst.)
Pepsinogen in blood, 568
Peptic ulcer, plasma pepsinogen in, 576
Perfusion technique for study of liver metabolism, 155
Perinephric experimental hypertension, method of producing, 914
Pernicious anemia, hematopoietic response in, comparison with hepatic uptake of radioactive Co^{60}-B_{12}, 60
untreated, hemolytic plasma factor in, 821 (Abst.)
Peripheral arteriovenous fistulas, preoperative and postoperative studies of patients with, 801 (Abst.)
Pharmacodynamic studies on three ganglionic blocking agents in treatment of hypertension, 828 (Abst.)
Pharmacology of mecanylamine (Inversine), 815 (Abst.)
Pheochromocytoma, diagnosis of, estimation of catechol amines in urine by means of a rabbit aortic strip as an aid in, 824 (Abst.)
Physiologic events, electronic switch for monitoring two simultaneously on a single-beam oscilloscope, 494
Pitressin and 1-norepinephrine, effect of, on Rb^{86} uptake, 931 (Abst.)
Plasma cell formation in bone marrow and lymph nodes, failure in agammaglobulinemia, 167
cholesterol, origin of, and rates of equilibration of liver, plasma, and erythrocyte cholesterol, 359
concentrations of D-glucuronolactone isonicotinyl hydrazone, 598
fibrinolytic activity of human, effect of calcium on, 965 (Abst.)
enzyme system of human, 951 (Abst.)
glutamic oxalacetic and glutamic pyruvic transaminase in, determination of, new method for, 785
glycine, determination of, microdiffusion method for, 657
heparin, determination of, an improved method for, 653
heparin-precipitable fraction of, 953 (Abst.)
17-hydroxycorticosteroid and blood cell changes following x-irradiation in Rhesus monkey, 816 (Abst.)
pepsinogen, effects of partial gastrectomy on, 573
proteins and the mechanism of corticosteroid excretion, association of 17-OH corticosteroids and 17-OH corticosteroid glucuronides with, 807 (Abst.)
thromboplastin component deficiency, variable manifestations of, 80
trapped, amount of, in red cell mass of hematocrit tube, 409
Plasmas, pathologic, prothrombin concentration in various, 95
Plastic containers, effect of, on red cells, 225

Platelet antigens, studies on. II. A_1 and A_2 subgroups in blood platelets, 530
radiochromate-labeled, survival of, in rabbits, 521
Plethysmographic determination of volume of gas trapped in lungs in pulmonary disease, 793 (Abst.)
Plethysmography, electrical impedance, and constant mass displacement ballistocardiography, 270
Poliomyelitis vaccine prepared from monkey kidney tissue cultures, serial urinary Addis counts in patients inoculated repeatedly with, 21
Porphyrins, effect of, on x-ray sensitivity of tumors, 949 (Abst.)
Postvalvulotomy syndrome, etiology and prevention, 794 (Abst.)
Potassium, toxicity of, influence of hypocalcemia induced by sodium ethylenediamine tetraacetate on, 544
Prednisolone, nontropical sprue treated with, simultaneous correction of plain-water deficit and extracellular fluid volume loss in, 929 (Abst.)
Pregnancies, normal and toxemic, effects of inhibition of renal carbonic anhydrase by Diamox in, 733
Pregnancy, normal and toxemic, blood levels of 17-hydroxycorticosteroids in, 385
synthesis of cholesterol during human, 937 (Abst.)
toxemia of, reversible glomerular lesions in, as shown by serial renal biopsies, 938 (Abst.)
Preservation of blood for transfusion. I. The effect of plastic containers on red cells, 225
Primaquine, antimalarial action of, against blood and tissue stages of falciparum malaria, 391
curative action of, potentiation of, in vivax malaria by quinine and chloroquine, 301
Primary aldosteronism, renal water concentration defect in, differentiation from diabetes insipidus, 809 (Abst.)
Proaccelerin, hereditary deficiency of, a family study, 98
Progesterone in biogenesis of steroid hormones in man, role of, 964 (Abst.)
Proteins, sensitization to foreign, early stages of, 957 (Abst.)
Protein-sparing effect of carbohydrate with and without testosterone, 840
Prothrombin assay, a simple, specific one-stage, using Russell's viper venom in cephalin suspension, 89
determinations, effect of suspended solids in thromboplastin preparations upon, 713
Pulmonary disease, gas trapped in lungs in, plethysmographic determination of volume of, 793 (Abst.)
fibrosis, diffuse, effects of, upon mechanics of lung ventilation, 791 (Abst.)
Pulmonary—Cont'd
hypertension and ventricular septal defects, surgical treatment of, with aid of mechanical pump-oxygenator, 809 (Abst.)
tuberculosis, laboratory and clinical studies of D-glucuronolactone isonicotinyl hydrazone in, 597
Pump-oxygenator, mechanical, surgical treatment of ventricular septal defects and pulmonary hypertension with aid of, 809 (Abst.)
Pyelonephritis, correlation of histopathology and clinical studies in, 925 (Abst.)
Pyrexin, pyrogenic factor of inflammatory exudates, and its relation to some bacterial pyrogens, 423
Pyridoxine hydrochloride, effect of, in acute alcoholic intoxication, 12

Q

Quantitative filter paper electrophoresis, comparative studies on, 772
Quinidine, metabolic effects of, in normal men, 813 (Abst.)
Quinine and chloroquine, curative action of primaquine in vivax malaria by, potentiation of, 301

R

Rabbit antiserum prepared by immunizing rabbits with purified human glomerular basement membrane or dog glomerular basement membrane, nephrotoxic properties of, 956 (Abst.)
Radioactive chromimum, method of employing, for assaying viability of human erythrocytes returned to circulation after refrigerated storage, 679
Co^{60}-B_{12}, hepatic uptake of, comparison with hematopoietic response in pernicious anemia, 60
label of albumins, gamma globulins, and globulins of intermediate mobility, persistence in blood of. III. Comparison of die-away plots following oral and intravenous administration of S^{35} label to the same subjects, 857
Radiochromate-labeled platelets, survival of, in rabbits, 521
Radiogold colloid, gelatin-stabilized, rate of removal of, from blood, factors affecting. I. The retardation of the radiogold disappearance rate by gelatin, 263
Radioiron, stimulation of erythropoiesis by plasma from anemic rats using, 938 (Abst.)
uptake of, in bone marrow as a measure of erythropoiesis, 941 (Abst.)

Rauwolfia serpentine and Reserpin, blood pressure effect of, in essential hypertension, 928 (Abst.)
Reaction of serous cavities to blood, 48
Red cell mass, amount of trapped plasma in, of hematocrit tube, 409
volume determinations, preparation of sodium chromate-Cr^{51} for, 484
cells, effect of plastic containers on, 225
in autoimmune hemolytic anemia, antibodies eluted from, thermal range of activity of, 74
Renal aspects of epidemic hemorrhagic fever, 32
biopsies, serial, reversible glomerular lesions in toxemia of pregnancy as shown by, 938 (Abst.)
carbonic anhydrase, effects of inhibition of, by Diamox in normal and toxemic pregnancies, 733
cortical necrosis due to Shwartzman reaction, characterization of the "fibrinoid" of, 797 (Abst.)
electrolyte transport in normal and nephrotic children, 333
vascular tone and glomerular filtration, effect of anemia and polycythemia on, 948 (Abst.)
water concentration defect in primary aldosteronism, differentiation from diabetes insipidus, 809 (Abst.)
Resistance strain gauges applied to respirometry, 120
Respiration in newborn infant, new method for studying, 120
Respiratory illness, association of APC viruses with, in student population, 812 (Abst.)
rate, routine measurement of, 928 (Abst.)
Respirometry, resistance strain gauges applied to, 120
Reticuloendothelial system, neoplastic disorders of leukoagglutinins in, observations on, 797 (Abst.)
Rh antibodies, experimental and statistical studies on, 199
mode of action of, investigation of, 204
techniques for estimation of, interpretation of results obtained by various, 219
Rhesus monkey, x-irradiation in plasma, 17-hydroxycorticosteroid and blood cell changes following, 816 (Abst.)
Rheumatoid disease, serum proteins, protein-bound polysaccharides and serum lipids in, zone electrophoresis in studies of, 398
Russell's viper venom in cephalin suspension, a simple, specific one-stage prothrombin assay using, 89

S

Salmonella typhi, isolation of, from blood stream, 128
Selenium cystine, effect of, on leukemia, 962 (Abst.)
Sensitization to foreign proteins, early stages of, 957 (Abst.)
Serologic investigations of herpes simplex virus infections, 1
Serous cavities, reaction of, to blood, 48
Serum, albumin and alpha, beta, and gamma globulin in, estimation of, simple, rapid procedure for, 476
turnover rate of, in nephrotic syndrome as determined by I^{131}-labeled albumin, 747
amino acid and blood sugar concentrations in viral hepatitis, effect of amino acid-glucose infusions upon, 560
calcium, determination of, micromethod for, 662
CO_2 content of, determination of, efficient clinical method for, 312
gamma globulin in dystrophia myotonica, 967 (Abst.)
glutamic oxalacetic transaminase as index of hepatocellular integrity, 831
iron, effect of disodium calcium versenate on, 539
protein-bound iodine, correction of erratic reagent blanks in determination of, 902
proteins and mucoproteins in infection, 808 (Abst.)
vitamin B_{12} concentrations in liver disease, 927 (Abst.)
Serums, antisheep red cell, hemolytic and blocking activities of, comparison of, 959 (Abst.)
Shock produced by endotoxin from gram-negative microorganisms, role of central nervous system in, 962 (Abst.)
Shwartzman reaction, renal cortical necrosis due to, characterization of the "fibrinoid" of, 797 (Abst.)
Single-breath analysis of ventilation, 798 (Abst.)
Sodium chromate-Cr^{51} red cell volume determinations, preparation of, 484
ethylenediamine tetraacetate, hypocalcemia induced by, influence of, on toxicity of potassium, 544
urinary excretion of, in adrenalectomized rats, effects of hydrocortisone on, 729
Spasm of esophagus, diffuse, intraesophageal pressures in, 804 (Abst.)
Specificity of autoantibodies in acquired hemolytic anemia, 805 (Abst.)
Spectrophotometric analysis of uncontaminated blood for oxyhemoglobin, 486
Sprue, nontropical, treated with Prednisolone, simultaneous correction of plain-water deficit and extracellular fluid volume loss in, 929 (Abst.)
Stain for granules in normal human erythrocytes, 885
Staphylococcal septicemia, intracranial complications of, clinical and pathologic observations on, 965 (Abst.)
Starvation diabetes in man, influence of dietary carbohydrate on development of, 804 (Abst.)

Stomach, secretion of acid, water and pepsinogen by human, 826 (Abst.)
Storage lability of human anti-hemophilic factor, studies on, 111
Strain gauges, resistance, applied to respirometry, 120
Streptococcus viridans, similarity of bactericidal rates of penicillin for, from successfully treated cases of bacterial endocarditis and from cases which relapsed, 41
Sucrose infusions in measuring extracellular space, problems in, 936 (Abst.)
Synovial fluid, chemical studies on, relative to intra-articular injection of hydrocortisone acetate, 720
Synthesis of cholesterol during human pregnancy, 937 (Abst.)
Syphilis, complement fixation test for, a new, 147

T

Test for herpes simplex, C.F., specificity of, 3
for syphilis, complement fixation, a new, 147
Testosterone, carbohydrate with and without, protein-sparing effect of, 840
Tetrazolium reduction by tubercle bacilli, 608
Thermal range of activity of antibodies eluted from red cells in autoimmune hemolytic anemia, 74
Thrombocythemia, hemorrhagic manifestations associated with, mechanism of, 930 (Abst.)
Thromboembolism, drop test studies on blood in, prognostic value of, 499
Thromboplastic formation, effect of Dicumarol on, 955 (Abst.)
Thromboplastin preparations, effect of suspended solids in, upon prothrombin determinations, 713
Thyroid gland inhibition, site of action of high, in blood thyroxine levels in, bringing about, 822 (Abst.)
Tissue and blood stages of falciparum malaria, antimalarial action of primaquine against, 391
Tissues, cultivation of, in small sealable dishes, 144
normal and tumor, metabolism of pentose 5-phosphate in, 792 (Abst.)
Toxemia of pregnancy, reversible glomerular lesions in, as shown by serial renal biopsies, 938 (Abst.)
Toxicity of potassium, influence of hypocalcemia induced by sodium ethylenediamine tetraacetate on, 544
Transfusion, blood for, preservation of. I. The effect of plastic containers on red cells, 225
"Tubeless" gastric analysis, quantitative modification of, 895
Tubercle bacilli, carbon 14-labeled acetate utilization by, determination of, 917, 960 (Abst.)
environmental dissemination and aerial transmission of, 791 (Abst.)
growth dynamics of, flask for study of, 651
tetrazolium reduction by, 608
Tuberculosis, pulmonary, laboratory and clinical studies in D-glucuronolactone isonicotinyl hydrazone in, 597

U

Ulcerative colitis, experimental, studies on, 812 (Abst.)
Ulcers, duodenal and gastric, basal and histalog secretion in, 307
Urinary Addis counts, serial, in patients inoculated repeatedly with poliomyelitis vaccine prepared from monkey kidney tissue cultures, 21
excretion of acid mucopolysaccharides by diabetic patients, 193
of Co^{60}-vitamin B_{12} as test for effectiveness of intrinsic factor preparations, 665
of sodium in adrenalectomized rats, effects of hydrocortisone on, 729
tests using vitamin B_{12} Co^{60} and intrinsic factor concentrates, diagnostic value of, in suspected cellular vitamin B_{12} deficiencies in man, 795 (Abst.)
formaldehyde production after periodic acid oxidation, demonstration of inhibition of, as related to volume of urine and samples oxidized, 323
osmolarity and specific gravity, comparative determinations of, 141
specific gravity and urinary osmolarity, comparative determinations of, 141
Urine, catechol amines in, estimation of, by means of rabbit aortic strip as an aid in diagnosis of pheochromacytoma, 824 (Abst.)
concentration of trace metals in, of treated and untreated hypertensive patients compared with normal subjects, 936 (Abst.)
nondialyzable material in normal human, 848
relationship of urorenninogen to uropepsinogen in human, 321
Urinometry, electrometric, 141
Urorennin, assay of, use of lyophilized milk in, 318
Urorenninogen, relationship of, to uropepsinogen in human urine, 321

V

Vaccine, poliomyelitis, prepared from monkey kidney tissue cultures, serial urinary Addis counts in patients inoculated repeatedly with, 21

Venous and arterial hemoglobin concentration in man, comparison of, 900
thromboembolism, drop test studies on blood in, 510
Ventilation, single-breath analysis of, 798 (Abst.)
Ventricular alternans, mechanical, diastolic overload in, 342
septal defects and pulmonary hypertension, surgical treatment of, with aid of mechanical pump-oxygenator, 809 (Abst.)
Viral hepatitis, serum amino acid and blood sugar concentrations in, effect of amino acid-glucose infusions on, 560
Viremia, acquired hemolytic anemia and, 580
Virus infections, herpes simplex, serologic investigations, 1
Viruses, APC, association of, with respiratory illness in student population, 812 (Abst.)
Vitamin B_6-deficient rats, isoniazid in, 549
B_6 metabolism in post-partum period, 817 (Abst.)
B_{12}, aggravation of clinical manifestations of folic acid deficiency by administration of, 822 (Abst.)
Vitamin—Cont'd
deficiencies in man, suspected cellular, diagnostic value of urinary excretion tests using vitamin B_{12} Co^{60} and intrinsic factor concentrates, 795 (Abst.)
K in liver disease, use of large doses of, 951 (Abst.)
Vitamins, B-complex, effect of, in acute alcoholic intoxication, 12
Vivax malaria, curative action of primaquine in, by quinine and chloroquine, potentiation of, 301

W

Water, body, total, measurement of, in human beings, 619

X

X-irradiation in Rhesus monkey, plasma 17-hydroxycorticosteroid and blood cell changes following, 816 (Abst.)
X-ray sensitivity of tumors, effect of porphyrine on, 949 (Abst.)

Z

Zone electrophoresis in studies of serum proteins, protein-bound polysaccharides and serum lipids in rheumatoid disease, 398
